29th June 2021

The Executive Secretary,
Uganda National Council for Science and Technology,
Plot 6 Kimera Road, Ntinda,
P.O. Box 6884, Kampala.

Dear Scientist,

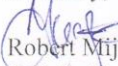

REQUEST FOR PERMISSION TO RESUME RESEARCH USING MY CURRENT LABORATORY INFRASTRUCTURE

As you are already aware, I am a private researcher in the field of molecular medicine, with key focus on proteomics, creating and designing enzymes for therapeutic purposes. Last year my activity was halted when the National Drug Authority confiscated my equipment and reagents, citing that the laboratory was not registered, among their other reasons.

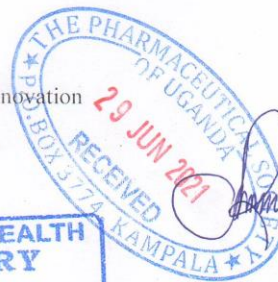

I acknowledge the mandate that your institution has in regulating scientific research in Uganda, and I am doing my best to ensure that my laboratory meets all the standards required for your approval. However, given the prevailing COVID-19 situation it is prudent that we scientists use all the resources available to fight the disease.

In my proteomics studies, I have already created polypeptides which I am certain that when tested could be solutions to **COVID-19, HIV, Hepatitis B** and **Cancer**, diseases that to-date have puzzled the scientific world. Moreover, my methodology does not pose any kind of harm to me and my surrounding. It is for this reason that I am requesting you allow me continue with my experiments using the infrastructure available to me. Should you need any more information about myself, my works or my company, I will always be ready to avail it to you.

Sincerely,

Robert Mijumbi
C.E.O. Biobert Research Group Ltd.
