Rumeo Towers, Plot 1055, Avenue,  
P.O. Box 23096, Kampala.

22.7.2021

Dear Scientist,

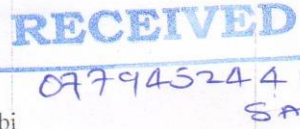

**MY PUBLICATIONS ON HIV, HEPATITIS B, CANCER AND COVID-19**

As you must be already aware, basing on the previous letters in which I copied you in, I design enzymes for therapeutic purposes. This work is unprecedented and as such is very mind-boggling to many scientists. The only protein that is currently used for medical purpose is insulin, which is a hormone, not an enzyme; moreover, it is administered subcutaneously yet my enzymes can be adapted for oral, intravenous and intramuscular routes of administration.

In order to bring this innovative treatment to the spotlight, I have resolved to publish all my works in peer-reviewed journals. The purpose of this letter, therefore, is to inform you that I am soon submitting papers for reviews and publications, and that as soon as they are accepted I will share with you the published work. Since Uganda at the moment does not have her own pharmacopoeia and those available in other continents do not contain enzymes as therapeutics in their formularies, this could be the most salient feature that will make Uganda's pharmaceutical development unique from others.

Sincerely,

Robert Mijumbi
